SUMMARY

3rd-year B.Tech CSE student with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and full-stack web development. Proficient in Java and Python; experienced in designing efficient algorithmic solutions and building end-to-end web applications using RESTful APIs, Servlets/JSP, and Flask/Django. Actively solving competitive programming problems on LeetCode to sharpen problem-solving skills.

TECHNICAL SKILLS

Languages: Java (Primary) | Python | JavaScript | C++

Web / Frontend: HTML5, CSS3, JavaScript (DOM), Responsive Design

Backend / Frameworks: Flask, Django (basic) | Servlets & JSP (Advanced Java)

Database: MySQL (JDBC) | localStorage (client-side persistence)

Tools & Platforms: Git, GitHub, VS Code, Chrome DevTools, Linux

Core Concepts: Data Structures & Algorithms | OOP | RESTful APIs | Session Management | DBMS | OS | CN

CODING PROFILES

LeetCode: leetcode.com/Vansh7818 — 100+ problems solved across Arrays, Strings, Linked Lists, Trees & DP

PROJECTS

Amazon Clone — E-commerce Frontend | HTML5 | CSS3 | JavaScript

- Engineered a fully responsive Amazon-style storefront featuring product listings, detail views, and a dynamic responsive grid layout.
- Implemented client-side search and category filtering with a persistent shopping cart leveraging localStorage for seamless cross-session state management.
- Designed interactive product cards, modal-based detail views, and a multi-step checkout flow UI to simulate real-world e-commerce behavior.

Secure Login/Logout System | Advanced Java | Servlets | JSP | JDBC | MySQL

- Architected a server-side authentication system using Java Servlets and JSP with robust session management and server-side input validation.
- Integrated MySQL database via JDBC for secure user credential storage, retrieval, and access control enforcement.
- Designed clear user flows for sign-in, sign-out, and role-based access restriction, following MVC separation principles.

Python Full-Stack Web Application | Python | Flask/Django | REST APIs | MySQL

- Developed RESTful API endpoints using Flask/Django and integrated them with frontend views for a functional full-stack application.
- Implemented CRUD operations, user authentication, and local deployment pipeline; demonstrated end-to-end integration of backend services with dynamic frontend pages.

EDUCATION

Bachelor of Technology — Computer Science & Engineering

Parul University, Waghodia, Vadodara, Gujarat | 2023 – 2027 | CGPA: 7.73

Relevant Coursework: Data Structures & Algorithms | DBMS | Operating Systems | Computer Networks | OOP

CERTIFICATIONS

- IBM: Getting Started with Artificial Intelligence (2025)
- IBM: Artificial Intelligence Fundamentals (2025)
- Networking Academy: Introduction to Modern AI (2025)
- AWS: Cloud Practitioner Essentials (2025)
- AWS Academy Graduate: AWS Academy Cloud Foundations (2025)
