

VANSH JAIN

Vadodara, Gujarat | +91-7818086344 | vanshj7818@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

B.Tech CSE student (2027) with practical experience developing and deploying full-stack web applications using Java and the MERN stack. Solid foundation in Object-Oriented Programming, Data Structures & Algorithms, REST API development, and database integration. Comfortable working across backend and frontend layers; seeking a Software Engineering internship focused on application software development and problem solving.

EDUCATION

B.Tech — Computer Science Engineering, Parul University, Vadodara Aug 2023 – May 2027 | CGPA: 7.45 / 10 | No Active Backlogs

Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

TECHNICAL SKILLS

Languages: Java (Primary), Python, JavaScript (ES6+), SQL

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, REST APIs, Problem Solving

Backend: Node.js, Express.js, Java Servlets, JSP, JDBC

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Databases: MongoDB, MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Vercel, Render

Auth & Security: JWT Authentication, bcrypt, Session Management

PROJECTS

Full-Stack E-Commerce Platform [GitHub](#) | [Live Demo](#)

React.js · Node.js · Express.js · MongoDB · JWT · bcrypt

- Developed a full-stack e-commerce application with a React.js frontend and a Node.js/Express.js REST API backend, using MongoDB for persistent storage of products, users, and orders.
- Implemented JWT + bcrypt authentication covering user registration, login, protected routes, and role-based access control; built a CRUD admin dashboard for product and order management.
- Deployed frontend on Vercel and backend on Render with environment-based configuration and automatic deployment integration using GitHub and Vercel/Render.

Personal Portfolio Website [GitHub](#) | [Live Demo](#)

React.js · Tailwind CSS · Vercel

- Developed a fully responsive single-page application using React.js functional components and hooks; implemented mobile-first design with Tailwind CSS and automatic deployment integration using GitHub and Vercel.

Secure Login & Authentication System

Java · Servlets · JSP · JDBC · MySQL

- Designed a server-side authentication system following MVC architecture using Java Servlets and JSP, with JDBC/MySQL for user credential storage, session lifecycle management, and server-side input validation to prevent unauthorized access.

ACHIEVEMENTS & ACTIVITIES

- Consistently practice Data Structures & Algorithms in Java on LeetCode — covering arrays, strings, hashing, recursion, sliding window, two pointers, and linked lists.
- Independently developed and deployed full-stack web applications integrating React.js frontends, Node.js/Java backends, MongoDB/MySQL databases, and JWT-based authentication systems.
- Participated in Wind Hackathon and ODOX Hackathon — collaborative, time-boxed software problem-solving under competition conditions.
